Southeast Rockford Groundwater Contamination Site
Superfund/Technical Reports

The Illinois EPA is requesting an expedited review of the QAPP for the Residential Air Sampling scheduled for late spring or early summer in 2003 for the Southeast Rockford Groundwater Contamination Site. On April 3, 2003 a pre QAPP meeting was held at US.EPA Region V to discuss issues related to preparation of the QAPP. At this meeting Illinois EPA was informed that normally a ninety-day period is standard for review of a QAPP. In light of the promise made by our Director to perform residential air sampling in Rockford at the earliest opportunity, the Illinois EPA is requesting that the review of the QAPP be conducted in an expedited manner.

Sincerely

Gary King Manager
Division of Remedial Management
